## SUMMARY

Founder-minded Full Stack Developer with hands-on experience building real-world web platforms using React, Angular, Node.js, and MongoDB. Strong focus on system design, algorithms, and clean architecture. Proven ability to ship end-to-end products, collaborate using Git, and solve real problems through software.

## EDUCATION

<b>12th Government School</b> <i>High School Diploma (Expected)</i>	Tbilisi, Georgia Sep 2016 – May 2027
--	---

## EXPERIENCE

<b>Founder &amp; Full Stack Developer — AlertUp</b> <i>Safety &amp; Emergency Evacuation Platform</i>	Dec 2025 – Present Tbilisi, Georgia
– Founded and developed AlertUp, a safety platform designed to guide users during building emergencies. – Built a scalable full-stack application using React, Tailwind CSS, Node.js, Express, and MongoDB. – Designed evacuation algorithms to calculate the safest and fastest escape routes. – Implemented QR-code-based location detection to identify user entry points inside buildings. – Planned system architecture, APIs, and database schemas with performance and scalability in mind.	

## PROJECTS

<b>AlertUp</b>   <i>React, Node.js, Express, MongoDB, Tailwind CSS, Algorithms, Git</i>	Dec 2025 – Present
– Developed a full-stack web platform with a RESTful API and a responsive React frontend. – Implemented QR code scanning to determine user location within buildings. – Visualized evacuation routes dynamically to guide users toward safe exits. – Applied algorithmic logic to optimize evacuation paths.	
<b>DevHealth</b>   <i>React, Supabase, Git, GitHub</i>	Oct 2025
– Built a full-stack health-focused platform using React and Supabase. – Selected among the <b>Top 20 projects</b> at Hacktoberfest Tbilisi. – Recognized for delivering one of the <b>best UI/UX designs</b> at the event.	
<b>Illusion</b>   <i>Angular, Node.js, Tailwind CSS, Git, GitHub</i>	Oct 2025
– Built a full-stack web application using Angular for the frontend and Node.js for the backend. – Implemented a complete purchasing workflow including product and order handling. – Integrated frontend and backend components to support dynamic data updates. – Maintained clean project structure and version control using Git and GitHub.	

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, C++, C, Python, HTML5, CSS3

**Frameworks:** React, Next.js, Angular, Node.js, Express.js

**Databases:** MongoDB, Supabase

**Developer Tools:** Git, GitHub, VS Code, Visual Studio, PyCharm, IntelliJ

**Libraries:** JWT, bcrypt
