

LAZARE MIRZIASHVILI

Full Stack Engineer | AI Engineer | UI/UX Designer

Tbilisi, Georgia | +995 555 992 212 | lazaremirziashvili8@gmail.com

lazare-mirziashvili.vercel.app | linkedin.com/in/lazare-mir | github.com/aponchikaj

SUMMARY

Full Stack Engineer, AI Engineer, and UI/UX Designer with a proven track record of shipping production web applications independently and within teams. Currently building AI-powered products at Unburned and Garage Records. Founded a safety-tech startup (AlertUp) from concept to investor pitch in under 6 weeks; Top 20 finalist at Hacktoberfest Tbilisi 2025 out of 140 teams. Deep experience across the modern JavaScript/TypeScript ecosystem, LLM integration (Claude, Gemini, OpenAI), and cloud infrastructure. Seeking an internship or junior/mid-level Full Stack or AI Engineering role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, C, HTML5, CSS3, SCSS

Frontend: React.js, Next.js, Angular, Tailwind CSS, Responsive Design, Accessibility

Backend: Node.js, Express.js, REST APIs, Socket.io, JWT, Authentication & Authorization Systems

Databases: PostgreSQL, MongoDB, Mongoose, Redis, Supabase

AI Engineering: Claude API, Claude Code, Gemini API, OpenAI API (ChatGPT), LLM Integration, Prompt Engineering, AI-Assisted Development Workflows

Cloud & DevOps: AWS (S3, EC2), Vercel, Git, GitHub, CI/CD Pipelines

Design & Tools: Figma, UI/UX Design, Jest, Postman, System Design, Data Structures & Algorithms

EXPERIENCE

Unburned (Quemmekh)

2026 – Present

AI Engineer & Full Stack Engineer

Tbilisi, Georgia

- Developing the product's website end-to-end with **Next.js**, **TypeScript**, **Node.js**, **Express.js**, and **PostgreSQL**, owning both frontend architecture and backend services.
- Integrating **Claude** (Anthropic API) into the platform and leveraging **Claude Code** for AI-assisted engineering workflows, accelerating feature delivery.
- Designing data models, API contracts, and AI-powered features in collaboration with the founding team.

Garage Records

April 2026 – Present

Full Stack Engineer, AI Engineer & UI/UX Designer

Tbilisi, Georgia

- Architecting and developing the backend for the official label website (garagerec.vercel.app): API design, database modelling, and server deployment.
- Created comprehensive, brand-consistent UI/UX designs and mockups in **Figma** for the label's public-facing platform.
- Integrating AI-driven features and collaborating within a creative collective on product direction, feature scope, and technical architecture.

Subsequence 2.0

April 2026 – Present

Full Stack Engineer & UI/UX Designer

Tbilisi, Georgia

- Leading UI/UX design and frontend architecture for an upcoming digital platform built from scratch.
- Designing the full system architecture; moving into server-side implementation upon design phase completion.

AlertUp — Emergency Evacuation Startup

Founder & Full Stack Engineer

Dec 2025 – Jan 2026

alertup.world

- Built a QR-code-based emergency evacuation SaaS from zero to production in under **6 weeks**: building owners upload evacuation maps and generate per-location QR codes; users scanning during an alarm receive real-time, location-aware routing to the nearest exit.
- Engineered the full stack: authentication & email verification, building/map management portal, dynamic QR generation, and server-side proximity routing logic.
- Pitched AlertUp to investor Pavle Mgeladze at the **re:invent accelerator** program in Tbilisi.

PROJECTS

Algoora — Competitive Coding Platform

React, Node.js, Express.js, MongoDB, Socket.io, Redis, Gemini AI

algoora.vercel.app

- Built a LeetCode/Codewars alternative from scratch: in-browser code compilation, algorithmic problem sets, a global ranked leaderboard, live competitions, and a full team system.
- Integrated **Gemini AI** for contextual hints, detailed problem explanations, and adaptive guidance; built a premium subscription model with PayPal/Paddle payment processing.
- Used **Redis** for performance caching and **Socket.io** for real-time tournament and competition features.

DevHealth — AI Developer Wellness Tool

React, TypeScript, Supabase, PostgreSQL, Tailwind, AI

devhealth.online

- **Top 20 finalist out of 140 teams** at Hacktoberfest Tbilisi 2025 — presented live to a jury panel at Free University of Tbilisi (co-built with Dachi Sebiskveradze).
- Co-developed an AI-powered developer burnout prevention platform and companion VS Code extension: Pomodoro timer, sleep/workout tracking, distraction blocking, and focus analytics.

Iluzia (Illusion) — Artist Poster E-Commerce

Angular, TypeScript, Node.js, Express.js, Mongoose, Tailwind

iluzia.vercel.app

- Independently designed and built a full-stack e-commerce store (artist & movie posters, Figma-designed artwork, end-to-end checkout) at age 13–14, demonstrating early command of full-stack development.

EDUCATION

Quantum — Computer Science School

Software Engineering Track (Founded by Zaza Omiadze)

2024 – Present

Tbilisi, Georgia

- Intensive curriculum covering data structures, algorithms, system design, and software engineering principles.
- Low-level computing foundations: binary, hexadecimal, and ASCII operations; upcoming coursework in Assembly, C, C++, and advanced SQL.

12th Public School of Tbilisi

Secondary Education Diploma

Graduated 2025

Tbilisi, Georgia

CERTIFICATIONS & ACHIEVEMENTS

HackerRank Certified: Frontend Developer (React) | JavaScript (Intermediate) | React Fundamentals

Hacktoberfest Tbilisi 2025: Top 20 Finalist from 140 teams — live presentation at Free University of Tbilisi

re:invent Accelerator: Selected to pitch AlertUp (safety-tech startup) to investor Pavle Mgeladze

Self-Taught Milestone: Shipped first full-stack production apps (Angular + Node.js + MongoDB) at age 13–14
